PROFESSIONAL SUMMARY

Results-driven Software Engineer with 3+ years of experience designing, developing, and maintaining scalable web applications and APIs using C#, ASP.NET (MVC and Web API), .NET Core, and SQL Server. Skilled across the full software development lifecycle (SDLC) in Agile/Scrum environments, with front-end experience in JavaScript, HTML, and CSS. Strong problem-solver with a proven record of resolving production issues, improving system stability, and delivering high-quality software on time.

WORK EXPERIENCE

Associate Software Engineer

Epsilon | Bangalore | August 2022 - Present

- Developed and enhanced backend services using C# and ASP.NET, contributing to REST API stability, bug fixes, and migration-related code changes across multiple systems.
- Built and maintained a custom Email API using .NET, and contributed to unit test coverage to support Test-Driven Development (TDD) practices.
- Used Azure DevOps for source control, work item tracking, and CI/CD pipeline coordination, supporting reliable and repeatable release cycles.
- Collaborated with analysts and cross-functional migration teams to resolve API and batch-level ambiguities, reducing turnaround time by 20-30%.
- Led reverse engineering of a large-scale legacy platform using AI-assisted analysis tools, informing architectural decisions and accelerating migration readiness.
- Supported production stability during Hypercare and transition phases, resolving critical defects and enhancing integration pipelines (SnapLogic, DataHub).
